

YAMBOL REGION HAS GOOD PERSPECTIVES FOR ECONOMIC GROWTH

As part of Southeastern Bulgaria, Yambol region is situated close to Stara planina (the Balkan mountain) and the Black sea, and borders with the Republic of Turkey. This is a favorable factor for its economic growth and development. The working factories have modern technologies and markets, which are in constant development. This predetermines the development of trade, agriculture and the related manufacturing sectors - manufacture of food, wines and alcohol, as well as textile and machine-building. The main driving force of the local economy are the medium enterprises, generating the highest sales revenues. The climate and the soils are suitable for agriculture. There are opportunities for the development of modern agro industry - the manufacture and processing of plant and animal products, dairy and meat foods, wines, alcohol and tourism.

TRADITIONAL AND NEW PRODUCTION

The industry of Yambol region is represented by the following sub-sectors: food industry, chemical industry, machine building and metal processing, textile and knitwear industry, clothing industry and others. There are new developing industries in the region, such as manufacturing of electrical systems for automobiles and recycling of plastic products for the production of fibres.

The favorable natural conditions in Yambol region create a good precondition for the development and construction of facilities for electricity production from renewable energy sources. There already are several working photovoltaic parks and several more are being built at the moment.
